## **Configuration Manager Android/iPhone/Blackberry**

### **Description:**

GoldSpot Media, Inc. needs a Configuration Manager to work on the builds and releases for our product lines in Android/iPhone/Blackberry and other handset operating systems.

Daily Responsibilities: Configuration Manager focused on Continuous Integration processes, Release Management, Software Configuration Management and Final Release Testing. Design, develop and perform build acceptance testing (BAT) of our middleware product lines on Smart phone platforms. Analyze/debug/resolve build, configuration and release management issues by working with various teams and customer. File issues/bugs into a bug database, track updates and compose deliverables for customers, in most disciplined and timely manner.

### **Necessary Skills (Must Have):**

- Knowledgeable in Linux OS make utility, svn repository, apk package formats, automation tools, e.g. Hudson-CI, etc.
- 3-yr experience working as Build/Release Manager in Linux or mobile OS environment required. Experience in build automation and testing is required.
- Working experience or familiarity with Android OS, iPhone and or Blackberry OS.
- Development experience in in C, Java, and scripting
- Good understanding of Android and iPhone build process most desirable.
- Good communication and documentation skills, as well as being a self-motivated driver are key points for us.
