

Mobile Web Developer

GoldSpot Media, Inc. is seeking a top-notch JavaScript Engineer with strong computer science fundamentals who feel at home developing high-quality web products that reach millions of users.

Responsibilities include:

- Work toward weekly milestones on the development of high-visibility, high-quality web products.
- Meet with team to assess feasibility and priority of new features
- Participate in testing regularly scheduled releases
- Collaborate with server-side engineers to optimize scalability and network efficiency
- Stay up-to-date with relevant technologies and proactively suggest architecture changes and new coding practices
- Other duties as appropriate

Job Requirements:

- 5+ years of experience in JavaScript and Web programming
- Object-oriented JavaScript experience
- Experience in HTML/CSS, DHTML and DOM programming
- At least minimal experience in HTML 5
- Experience with web related network and data protocols (HTTP, etc...)
- Experience with web services, and executing web services from JavaScript code.
- Minimum of B.S. in Computer Science or equivalent
- jQuery experience desirable, not required.
